KATHLEEN HURST APPOINTED TO DIRECTOR OF ONSITE CLINIC OPERATIONS AND CASE MANAGEMENT PROGRAMS FOR WORKCARE, INC.

Anaheim, California – WorkCare, Inc. recently announced the appointment of Kathleen Hurst to the position of director of onsite clinic operations and case management programs. With more than 20 years in the field of occupational healthcare, Kathy is a proven problem-solver with a wide range of practical knowledge and field experience in business management.

“Our onsite clinics and case management services are an extension of our corporate identity,” said company CEO and President Peter P. Greaney, MD. “It is imperative that we have the right team in place to help orchestrate the appropriate processes and provide solutions that bring order, stability and value to clients. As the duties of our case management services and onsite clinic operations overlap, it was a natural choice to combine the duties into one job and Kathy is just what the doctor ordered.”

In her new role, Kathy will serve as the liaison between the client company and WorkCare's onsite clinics. She is primarily responsible for ensuring the smooth operation of clinics located in six states and the timely resolution of issues that develop in the complex regulatory environment of mines and refinery facilities.

“Periodic analysis and change of processes and workflows is an important part of our on-going commitment to support our clients' health and wellness initiatives,” said Kathy. “The healthcare regulatory environment is evolving and I ensure that our clinics and programs stay current.”

Kathy holds a Master of Business Administration from Duke University and a Bachelor of Arts in Biology from Southern Illinois University.
